

S1 OFFSET JACK SOCKET WITH CHASSIS GROUND

The Cliff ¼", offset-nose, space-saving, narrow-body, S1 jack socket offers higher PCB packing densities to equipment manufacturers. This S1 has an integral, chassis-grounding contact, which connects to the barrel of the plug for maximum earth continuity, ensuring the lowest noise signals and maximum safety. Applications for this space-saving jack socket include musical instruments, amplifiers, effects pedals and audio equipment where space is at a premium.
