EARTH BOND CONTINUITY REEL

These long-life, high-reliability cable test reels are intended for professional R2 and earth-bond continuity-testing and are compatible with a wide variety of test meter brands. These can be used as an extension for all types of insulation and multifunction testers fitted with 4mm terminations. The extension lead is terminated with a shielded 4mm plug and push-on crocodile clip rated 10A, 1000V CAT II, 600V CAT III. The reels are available with standard lengths of 30m and 50m of double-insulated cable which provides visual indication of any damage by revealing the white inner sheath in the event of misuse or cracking.

Dimensions: 240mm (H), 176mm (W), 90mm (D) or 130mm over handles

Part Nos:

CIH299430 – 30m cable length

CIH299450 – 50m cable length
